

JUSTUS

Sorghum

Profile

JUSTUS is a high-yielding grain sorghum variety. The variety grows to a height of about 140 cm and shows very good stability. The panicles form white grains. This sorghum variety is medium early and best suited for professional grain sorghum cultivation in the south and southeast of Europe.

Recommended sowing rate: **30- 35** grains/ m²

- ✓ High grain yield
- ✓ Good yield stability
- ✓ Mid early maturity group
- ✓ Grain colour: white

Usage

Silo

Corn

Dualtype

Sowing date

Mid may to mid June, min. 12°C soil temperature.

Seedbed

The seedbed should be as fine-crumbled as possible (similar to beet) and a good connection to the capillary water must be ensured.

Seeding procedure

Single grain or drill seeding technique is possible. The beet technique can also be used. Particularly with drill seeding, care must be taken to ensure sufficient reconsolidation.

Sowing depth

2-4 cm
