

EUROMIC

Trifolium repens Turf

Profile

EUROMIC is our all-new small-leaved mini clover for lawn mixtures with good classifications in international rankings[1]. EUROMIC remains low, has slow regrowth of small leaves with a good winter hardiness. In contrast to typical white clover, **EUROMIC** tolerates frequent mowing and moderate wear.

Due to his ability to store atmospheric nitrogen this turf clover is suitable for parks and sports fields and is turning low nitrogen nutrient levels up to provide the surrounding grass plant with the collected nitrogen. It produces fresh green color during the summer and all the year and that goes for the whole grass clover turf pitch.

Choose **EUROMIC** to get a rich green appearance with fewer efforts!

- Suitable for lawn and park mixtures
- Fresh green color all the year
- No need for additional N fertilizer
- Less water requirements
- Low maintenance requirements
- Excellent performance

Agronomic properties

Close mowing tolerance	1 2 3 4 5 6 7 8 **9**	very high
Wear tolerance	1 2 3 4 **5** 6 7 8 9	medium
Visible influence in colour	1 2 3 4 5 6 7 8 **9**	very high
Smallness of leaf	1 2 3 4 **5** 6 7 8 9	medium
Disease resistance	1 2 3 4 5 6 7 8 **9**	very high
Winter hardness	1 2 3 4 5 6 7 8 **9**	very high
