

FLYNT

CA. S 110 | CA. K 130

Remain flexible in your crop rotation

Profile

FLYNT is the new ultra-early silage maize. Additionally, FLYNT can also be used as grain maize. Field trials in Germany reached grain yields of 6,8 tons per hectare. Due to a high proportion of flint genetics and quick youth development, the maize can be flexible into different crop rotations.

- ✓ Quick youth development
- ✓ High starch content
- ✓ Suitable for early and late sowing

General

Usage	  
Silo maturity	ultra early
Grain maturity	ultra early
Maturity forage	ca. 110
Maturity grain	ca. 130
Type of grain	flint
Hybrid	Three-way cross
Sowing date	 <div> <div>early</div> <div>late</div> </div>

Breeder classification: +++ = very good / very high | ++ = good / high | + = medium

Resistance to diseases

Maize smut	<div> <div></div> <div></div> <div></div> </div>
Helminthosporium	<div> <div></div> <div></div> <div></div> </div>

Location

Limited areas	
Soil type	
Humidity	

Sowing

Forage	10 - 12 Plants/m ²
Grain	9 - 11 Plants/m ²
