

## FLYNT

CA. S 110 | CA. K 130

**Remain flexible in your crop rotation**

### Profile

FLYNT is the new ultra-early silage maize. Additionally, FLYNT can also be used as grain maize. Field trials in Germany reached grain yields of 6,8 tons per hectare. Due to a high proportion of flint genetics and quick youth development, the maize can be flexible into different crop rotations.

- Quick youth development
- High starch content
- Suitable for early and late sowing

Also available in  
**Organic**  
quality

## General

Usage	  
Silo maturity	ultra early
Grain maturity	ultra early
Maturity forage	ca. 110
Maturity grain	ca. 130
Type of grain	flint
Hybrid	Three-way cross
Sowing date	 early   late

Breeder classification: +++ = very good / very high | ++ = good / high | + = medium

## Resistance to diseases

Maize smut	  
Helminthosporium	  

## Location

Limited areas	
Soil type	 heavy   light
Humidity	 wet   dry

## Sowing

Forage	10 - 12 Plants/m <sup>2</sup>
Grain	9 - 11 Plants/m <sup>2</sup>
