

PROPULSE

CA. K 270

Profile

PROPULSE is a typical medium-late grain maize, which is characterised by high yields due to its excellent cob filling. The variety profile is rounded off by good agronomic properties: good stability until harvest, high health status and early flowering.

- ✓ Very good health status
- ✓ Early flowering
- ✓ Good stability

General

Usage	 
Grain maturity	mid-late
Maturity grain	ca. 270
Type of grain	dent
Hybrid	Single-cross
Sowing date	

Breeder classification: +++ = very good / very high | ++ = good / high | + = medium

Resistance to diseases

Maize smut	<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="radio"/>
Helminthosporium	<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="radio"/>

Location

Soil type

heavy | light

Humidity

wet | dry

The figure shows two horizontal sliders. The top slider is labeled 'Soil type' and has a scale from 'heavy' to 'light'. The bottom slider is labeled 'Humidity' and has a scale from 'wet' to 'dry'. Both sliders have a dark teal bar representing the current range and a light teal bar representing the full range. A vertical line marks the center of each scale.

Sowing

Grain	7 - 9 Plants/m ²
