HONOREEN

S 290

Yield, more yield, HONOREEN

Profile

HONOREEN is a mid-late dent maize with a high starch yield and a silage maize for favorable sites for maize cultivation. Visually, the variety stands out due to its height and enormous leaf mass. The long cobs have 16 to 18 grain rows and good tip filling. In addition, this maize has a quick juvenile development, a good stay-green character and a healthy stem. In 2023, HONOREEN was tested in the EU-trials in the medium-late silage maize maturity segment for the second year and achieved the top position in the - ranking for total dry matter yield (rel.).

- Visually impressive maize hybrid
- High-yielding biomass type
- Winner of biogas trials from Pro-Corn in 2022

General

Usage	
Silo maturity	mid-late
Maturity forage	290
Type of grain	flint intermediate
Hybrid	Three-way cross

Classification according to the Descriptive Variety List - Bundessortenamt, Germany 2025 and our own results. Breeder rating: +++ = very good/very high | ++ = good/high | + = medium

Resistance to diseases

Maize smut	⊕ ⊕ ○
Helminthosporium	⊕ ⊕ ○

Location

Soil type	
Humidity	

Sowing

Forage	8 - 10 Plants/m²
