

PURPLE

S 280

High-yielding silage and biogas maize

Profile

Mid-late silage maize with high dry matter and starch yields

Next to high dry matter and starch yields, PURPLE also has a high fodder quality. The large plant has an intermediate stay green characteristic combined with good stability and good health of the leaves. The variety is interesting for biogas production because of its high methane yields.

- High dry matter and starch yields
- Good stem stability
- Good leaf health

General

Usage	
Silo maturity	mid-late
Maturity forage	280
Type of grain	dent intermediate
Hybrid	Single-cross
Sowing date	early | late

Breeder rating: +++ = very good/very high | ++ = good/high | + = medium

Resistance to diseases

Maize smut	++
Helminthosporium	+

Location

Soil type	heavy | light
Humidity	wet | dry

Sowing

Forage	8 - 10 Plants/m²
