

## **Profile**

Mid-late silage maize with high dry matter and starch yields

Next to high dry matter and starch yields, PURPLE also has a high fodder quality. The large plant has an intermediate stay green characteristic combined with good stability and good health of the leaves. The variety is interesting for biogas production because of its high methane yields.

- ✓ High dry matter and starch yields
- ✓ Good stem stability
- ✓ Good leaf health

## General

Silo maturity mid-late

Maturity forage 280

Type of grain dent intermediate

Hybrid Single-cross

Sowing date early 0 late

Breeder rating: +++ = very good/very high | ++ = good/high | + = medium

Resistance to diseases

Maize smut

•

Helminthosporium

## Location

Soil type	heavy 0 light	
Humidity	wet 0 dry	

## Sowing

Forage

8 - 10 Plants/m<sup>2</sup>
