

PROUD MARY

TAGETES PATULA

Profile

Tagetes patula Proud Mary is a strong control agent of the root lesion nematode *Pratylenchus penetrans*. In addition to its action on *Pratylenchus penetrans*, initial research shows that the variety Proud Mary also has activity against *Meloidogyne chitwoodi*. The hybrid variety Proud Mary grows strongly throughout the season, suppressing weeds and yielding a lot of organic matter.

- ✓ High uptake of nitrogen from soil
- ✓ Tagetes has perennial activity against *Pratylenchus penetrans*
- ✓ Strong through-growth and therefore weed-suppressing
- ✓ Very high type with lots of biomass
- ✓ Provides plenty of nectar and promotes above-ground biodiversity

General

Green fertilizer

Sowing

8 - 10 kg/ha

Sowing date

Mid of May to end of July
