

LINKARUS
crimson clover
(*Trifolium incarnatum*)

Suitable for multiple uses

LINKARUS is an overwintering crimson clover suitable for different uses. It is an ideal winter hardy cover crop fixing and storing nitrogen. At the same time, it supplies valuable protein as forage component. LINKARUS is characterised by its fast growth, intermediate flowering and mass of fibrous roots and dense foliage.

- ✓ Efficient cover crop and forage variety
- ✓ Intermediate flowering
- ✓ Ideal mixture component
