

LIVIOLETTA

Pea

(*Pisum sativum*)

Top variety for green manure and forage use

LIVIOLETTA is one of the top forage pea varieties for green manuring and forage. It shows good standing ability and produces a high protein content as well as high dry matter yields. A low thousand grain weight reduces sowing intensity. This undemanding, deep rooting variety is excellent for cover cropping.

- ✓ One of the top pea varieties for cover crop and forage use
- ✓ High protein contents and dry matter yields
- ✓ Purple flower
