

COUNTRY FIELD FORAGE 2054

Clovergrass, 1-2 years

One to two years clovergrass mixture for medium to good sites

Clovergrass for one to two years use with high feeding value and uniform emergence. The selected varieties show good winterhardiness and the high percentages of red and white clover ensures high protein contents and yields.

The legumes are treated with DSV's DynaSeed LegumeMaxx, which contains among others species-specific bacteria. DynaSeed LegumeMaxx demonstrably and significantly improves nitrogen fixation, root development, and thus yield.

Components

60 %	Lolium multiflorum	Dolomit*, Lipsos*
30 %	Trifolium pratense	Harmonie, Milvus, Taifun 
10 %	Lolium hybridum	Astoncrusader

- ✓ Red and White clover for N-fixation
- ✓ Good winterhardiness

Locations & Usage

Dry		Peat Soil	
Normal		Altitude	
Wet			

+++ = highly suitable | ++ = suitable | + = conditionally suitable | - = not given

Usage per year: 4 – 5 harvests per year
Sowing rate: 35 – 40 kg/ha for new sowing

*für die Zwischenfruchtnutzung geeignet, da Ertrag im ersten Schnitt überdurchschnittlich hoch
