

COUNTRY FIELD FORAGE 2059

Perennial alfalfa-clovergrass dry

Perennial alfalfa-clovergrass for medium to dry sites

Perennial mixture with high protein content and yield capacity due to red clover and alfalfa. High-sugar grass species significantly improve the silage process.

The legumes are treated with DSV's DynaSeed LegumeMaxx, which contains among others species-specific bacteria. DynaSeed LegumeMaxx demonstrably and significantly improves nitrogen fixation, root development, and thus yield.

- ✓ Sophisticated, species-rich composition
- ✓ Red clover and Alfalfa for high protein content
