

COUNTRY FIELD FORAGE 2060

Alfalfa powermix

Persistent alfalfa mixture for perennial use on all areas where alfalfa is well suited

Pure alfalfa mixture consisting of top varieties for highest yields and protein contents on dry and groundwater-remote sites. The following crop benefits from the high N-fixation capacity.

The alfalfa seeds are treated with DSV's DynaSeed LegumeMaxx, which contains among others species-specific bacteria. DynaSeed LegumeMaxx demonstrably and significantly improves nitrogen fixation, root development, and thus yield.

- ✓ 100% Alfalfa
- ✓ N-fixing and protein-rich

Components

100 %	Medicago sativa	Dakota, Fleetwood, Fraver, Planet	
-------	-----------------	-----------------------------------	--

Locations & Usage

Dry	+ + +	Peat Soil	
Normal	+ + +	Altitude	+ + +
Wet	+ +		

+++ = highly suitable | ++ = suitable | + = conditionally suitable | - = not given

Usage per year: 3 – 4 harvests per year
Sowing rate: 20 kg/ha for new sowing
Sowing time: from April to end of August
