

COUNTRY GRASSLAND 2010

Universal with clover

Broad site suitability for cutting and grazing

This mixture contains high percentages of Meadow fescue and Timothy for an improved winterhardiness as well as English ryegrass with peat soil suitability. The included Smooth-stalked meadow grass provides a dense sward and the white clover increases the elasticity of use.

The white clover seeds are treated with DSV's DynaSeed LegumeMaxx, which contains among others species-specific bacteria. DynaSeed LegumeMaxx demonstrably and significantly improves nitrogen fixation, root development, and thus yield.

- ✓ Winterhardiness through Timothy and Meadow fescue
- ✓ High sward density
- ✓ White clover for N-fixation
- ✓ Peat soil suitability

Components

47 %	Festuca pratensis	Baltas, Schwetra 
17 %	Phleum pratense	Radde
10 %	Poa pratensis	Liblue
10 %	Festuca rubra rubra	Rafael
6%	Trifolium repens	Bianca, Liflex 
4 %	Lolium perenne (late)	Valerio
3 %	Lolium perenne (early)	Mirtello
3 %	Lolium perenne (intermediate)	Astonhockey

Locations & Usage

Dry		Altitude	
Normal		Grazing	
Wet		Grazing and cutting	
Peat Soil		Cutting	

+++ = highly suitable | ++ = suitable | + = conditionally suitable | - = not given

Usage per year: 3 – 4 harvests per year
Sowing rate: 35 – 40 kg/ha for new sowing, 20 – 25 kg/ha for overseeding (only for open swards)
