

COUNTRY GRASSLAND 2016

For higher altitudes

For a late start of vegetation, persistence and winterhardiness

This mixture is especially designed for high altitudes and contains varieties recommended in southern Germany. Phleum pratense, Poa pratensis and Dactylis glomerata provide good winter hardiness and high persistence. The combination of red and white clover makes the mixture suitable for more extensive sites.

The legumes are treated with DSV's DynaSeed LegumeMaxx, which contains among others species-specific bacteria. DynaSeed LegumeMaxx demonstrably and significantly improves nitrogen fixation, root development, and thus yield.

Components

25 %	Lolium perenne (early)	Mirtello, Watson
20 %	Lolium perenne (intermediate)	Alligator, Explosion 
20 %	Phleum pratense	Aturo, Radde
10 %	Lolium perenne (late)	Hurricane, Valerio
10 %	Poa pratensis	Liblue
5 %	Dactylis glomerata	Rosseur
5 %	Trifolium pratense	Harmonie, Milvus, Taifun 
5 %	Trifolium repens	Bianca, Liflex 

Locations & Usage

Dry		Altitude	
Normal		Grazing	
Wet		Grazing and cutting	
Peat Soil		Cutting	

+++ = highly suitable | ++ = suitable | + = conditionally suitable | - = not given

Usage per year: 3 – 5 harvests per year

Sowing rate: 30 – 35 kg/ha for new sowing, 15 – 20 kg/ha for overseeding, 7 – 10 kg/ha for overseeding several times

per year
