

COUNTRY GRASSLAND 2018

For higher altitudes, intensive

Mixture for high use intensities and a high basic ration

Mixture for intensive use with broad site suitability, especially at higher altitudes. Winterhardy species and varieties ensure high cultivation safety and have special recommendation for southern Germany. The white clover fixes atmospheric nitrogen and increases the elasticity of use.

The white clover seeds are treated with DSV's DynaSeed LegumeMaxx, which contains among others species-specific bacteria. DynaSeed LegumeMaxx demonstrably and significantly improves nitrogen fixation, root development, and thus yield.

- ✓ Winterhardy and persistent
- ✓ With White clover for N-fixation
- ✓ For intensive use

Components

40 %	Lolium perenne (intermediate)	Alligator, Explosion 
25 %	Lolium perenne (late)	Hurricane, Valerio
10 %	Lolium perenne (early)	Mirtello, Watson
10 %	Phleum pratense	Aturo
10 %	Poa pratensis	Liblue
5 %	Trifolium repens	Bianca, Liflex 

Locations & Usage

Dry	  	Altitude	  
Normal	  	Grazing	  
Wet	  	Grazing and cutting	  
Peat Soil	  	Cutting	  

+++ = highly suitable | ++ = suitable | + = conditionally suitable | - = not given

Usage per year: 3 – 5 harvests per year
Sowing rate: 35 – 40 kg/ha for new sowing, 15 – 20 kg/ha for overseeding, 7 – 10 kg/ha for overseeding several times per year
