

COUNTRY ORGANIC GRASSLAND 2460

Medium-late with clover

High-yielding mixture for cutting and grazing for ryegrass-suitable sites

With the special composition of intermediate and late perennial ryegrass and white clover, COUNTRY Grassland 2460 is an excellent provider of palatable and high energy forage. The perennial ryegrass leads to high sugar contents and thus to improved ensilability and higher feed intake. Moreover the mixture has a high use elasticity. With regular overseeding, forage quality of pastures is maintained or even improved.

The white clover seeds are treated with DSV's DynaSeed LegumeMaxx, which contains among others species-specific bacteria. DynaSeed LegumeMaxx demonstrably and significantly improves nitrogen fixation, root development, and thus yield.

- ✓ High yielding, palatable forage
- ✓ Flexible in use
- ✓ Suitable for overseeding and undersowing

Components

48 %	Lolium perenne (intermediate)	Astonhockey, Euroconquest 
45 %	Lolium perenne (late)	Valerio, Therese
10 %	Trifolium repens	Bianca, Liflex 

Locations & Usage

Dry	  	Grazing	  
Normal	  	Grazing and cutting	  
Wet	  	Cutting	  
Peat Soil	  	Energy density	  
Altitude	  	Digestibility	  
Extensive usage	  	Protein	  

+++ = highly suitable| ++ = suitable | + = conditionally suitable| - = not given

Sowing rate: 40 kg/ha for new sowing, 20 – 25 kg/ha for overseeding,
7 – 10 kg/ha for overseeding several times per year

Sowing time: from Mach to September

Usage per year: 2
