

COUNTRY ORGANIC GRASSLAND 2462

Peat soils and higher altitudes

For intensive use on mineral and peat soils

In this mixture we use special varieties of perennial ryegrass that have been tested on peat soils. These varieties convince by their extraordinary persistence and winter hardiness. Adding Timothy makes COUNTRY Grassland 2462 a suitable partner for moist and hilly areas, and in combination with white clover a swift sward density is provided. The white clover also makes it more palatable and it fixes nitrogen. With regular overseeding, the forage quality of pastures is maintained or even improved.

The white clover seeds are treated with DSV's DynaSeed LegumeMaxx, which contains among others species-specific bacteria. DynaSeed LegumeMaxx demonstrably and significantly improves nitrogen fixation, root development, and thus yield.

- ✓ High yields and quality
- ✓ Peat soil suitability
- ✓ Timothy for winterhardiness

Components

30 %	Lolium perenne (early)	Karatos, Mirtello
25 %	Lolium perenne (intermediate)	Euroconquest  , Explosion 
25 %	Lolium perenne (late)	Therese, Valerio
13 %	Phleum pratense	Aturo, Radde
7 %	Trifolium repens	Bianca, Liflex 

Locations & Usage

Dry		Grazing	
Normal		Grazing and cutting	
Wet		Cutting	
Peat Soil		Energy density	
Altitude		Digestibility	
Extensive usage		Protein	

+++ = highly suitable| ++ = suitable | + = conditionally suitable| - = not given

Sowing rate: 35 – 40 kg/ for new sowing, 15 – 20 kg/ha for overseeding,

7 – 10 kg/ha for overseeding several times per year

Sowing time: from Mach to September

Usage per year : 3 – 5
