

COUNTRY ORGANIC GRASSLAND 2464

Universal

Broad site adaptability for cutting or grazing use

The balanced composition of COUNTRY Grassland 2464 provides good persistence and winter hardiness. The mixture is universally usable on different locations and delivers a good nutrition value.

The white clover seeds are treated with DSV's DynaSeed LegumeMaxx, which contains among others species-specific bacteria. DynaSeed LegumeMaxx demonstrably and significantly improves nitrogen fixation, root development, and thus yield.

- ✓ Broad site suitability
- ✓ High sward density
- ✓ Good winterhardiness

Components

20 %	Lolium perenne (intermediate)	Explosion, Euroconquest 
20 %	Lolium perenne (late)	Valerio, Sherlock
20 %	Festuca pratensis	Liherold, Schwerta
17 %	Lolium perenne (early)	Karatos, Mirtello
17 %	Phleum pratense	Aturo, Radde
6 %	Trifolium repens	Bianca, Liflex 

Locations & Usage

Dry	  	Grazing	  
Normal	  	Grazing and cutting	  
Dry	  	Cutting	  
Peat Soil	  	Energy density	  
Altitude	  	Digestibility	  
Extensiv usage	  	Protein	  

+++ = highly suitable | ++ = suitable | + = conditionally suitable | - = not given

Sowing rate: 35 – 40 kg/ha for new sowing, 15 – 20 kg/ha for overseeding (only with high gap ratios in the sward)
Sowing time: from Mach to September
Usage per year: 3 – 4
