

COUNTRY ORGANIC GRASSLAND 2470

Cutting and grazing

Cutting and grazing usage

COUNTRY Grassland 2470 is a mixture consisting of perennial ryegrass, red- and white clover and is especially suited for perennial organic field forage cultivation on all ryegrass-compatible sites. It is characterized by rapid youth development, high protein yield and high forage quality. Besides using it for cutting, it is also possible to use it for grazing, green manure and overseeding of red and white clover.

The legumes are treated with DSV's DynaSeed LegumeMaxx, which contains among others species-specific bacteria. DynaSeed LegumeMaxx demonstrably and significantly improves nitrogen fixation, root development, and thus yield.

- ✓ High protein content
- ✓ High forage quality
- ✓ For overseeding red and white clover

Components

35 %	Lolium perenne (intermediate)	Astonhockey, Euroconquest 
32 %	Lolium perenne (late)	Valerio, Sherlock
23 %	Trifolium pratense	Harmonie, Taifun, Milvius 
10 %	Trifolium repens	Bianca, Liflex 

Locations & Usage

Dry	  	Grazing	  
Normal	  	Grazing and cutting	  
Wet	  	Cutting	  
Peat Soil	  	Energy density	  
Altitude	  	Digestibility	  
Extensiv usage	  	Protein	  

+++ = highly suitable| ++ = suitable | + = conditionally suitable| - = not given

Sowing rate: 35 – 40 kg/ha for new sowing, 15 – 20 kg/ha for overseeding,
7 – 10 kg/ha for overseeding several times per year
Sowing time: from Mach to September
Usage per year: 4 – 5
