

COUNTRY ORGANIC FIELD FORAGE 2480

Alfalfa grass perennial

Two- to three-year alfalfa-grass mixture for all alfalfa-suitable sites

COUNTRY Field forage 2480 is able to deliver high yields with excellent fodder quality. Meadow fescue and Timothy are good partners for Alfalfa and improve the balance between protein and energy content of the yields. The deep root systems ensures supply of important nutrients even when conditions are dry. The alfalfa seeds are treated with DSV's DynaSeed LegumeMaxx, which contains among others species-specific bacteria. DynaSeed LegumeMaxx demonstrably and significantly improves nitrogen fixation, root development, and thus yield.

- ✓ 80 % Alfalfa
- ✓ High protein content
- ✓ High yields and qualities

Components

80 %	Medicago sativa	Planet, Fleetwood   DynaSeed 
10 %	Festuca pratensis	Liherold, Baltas, Schwetra 
10 %	Phleum pratense	Aturo

Locations & Usage

Dry	  	Grazing	  
Normal	  	Grazing and cutting	  
Wet	  	Cutting	  
Peat Soil	  	Energy density	  
Altitude	  	Digestibility	  
Extensive usage	  	Protein	  

+++ = highly suitable| ++ = suitable | + = conditionally suitable| - = not given

Sowing rate: 20 – 25 kg/ha
Sowing time: from April to August
Usage per year: 3 – 4
