

COUNTRY ORGANIC FIELD FORAGE 2484

Clover grass perennial

High-yielding, high-quality mixture for perennial clover-grass production

The balanced composition of COUNTRY Field forage 2484 is ideal for cutting. The different types of ryegrass along with red clover are able to ensure nutritional value and high yields up to three years. The mixture provides good green fodder and is also suitable for high-quality silage.

The red clover seeds are treated with DSV's DynaSeed LegumeMaxx, which contains among others species-specific bacteria. DynaSeed LegumeMaxx demonstrably and significantly improves nitrogen fixation, root development, and thus yield.

- ✓ High yields from the first cut onwards
- ✓ Perennial use
- ✓ High protein content

Components

30 %	Lolium perenne (intermediate)	Astonhockey, Explosion 
20 %	Trifolium pratense	Harmonie, Milvus, Taifun 
20 %	Lolium hybridum	Astoncrusader
20 %	Lolium multiflorum	Dolomit

Locations & Usage

Dry		Grazing	
Normal		Grazing and cutting	
Wet		Cutting	
Peat Soil		Energy density	
Altitude		Digestibility	
Extensive usage		Protein	

+++ = highly suitable| ++ = suitable | + = conditionally suitable| - = not given

Sowing rate: 35 – 40 kg/ha
Sowing time: from April to August
Usage per year: 4 – 6
