

COUNTRY ORGANIC FIELD FORAGE 2485

Clover grass 1-2 years

High-yielding, high-quality mixture for one- to two-year clover-grass production

COUNTRY Field forage 2485 is a combination of Italian ryegrass and Red clover and produces high yields with high crude protein content. The use of winterhardy varieties of Italian ryegrass make a two year use possible. The high content of Red clover fixes nitrogen and is a good partner for organic crop rotation. The red clover seeds are treated with DSV's DynaSeed LegumeMaxx, which contains among others species-specific bacteria. DynaSeed LegumeMaxx demonstrably and significantly improves nitrogen fixation, root development, and thus yield.

- ✓ High yielding
- ✓ High protein content through high clover share
- ✓ N-fixation

Components

60 %	Italian ryegrass	Dolomit, Lipsos
40 %	Trifolium pratense	Harmonie, Milvus, Taifun 

Locations & Usage

Dry	  	Grazing	  
Normal	  	Grazing and cutting	  
Wet	  	Cutting	  
Peat Soil	  	Energy density	  
Altitude	  	Digestibility	  
Extensive usage	  	Protein	  

+++ = highly suitable| ++ = suitable | + = conditionally suitable| - = not given

Sowing rate: 35 – 40 kg/ha
Sowing time: from April to August
Usage per year: 4 – 6
