

COUNTRY ORGANIC FIELD FORAGE 2487

Clover grass annual

Fast-growing clover-grass mixture for
spring and catch crop sowing

The non winterhardy mixture is ideal for several cuts and delivers good yields. COUNTRY Field Forage 2487 is optimal for spring sowing. The combination of different types of annual clover and ryegrass provide a protein rich quality forage and ensure the supply of nutrients.

The legumes are treated with DSV's DynaSeed LegumeMaxx, which contains among others species-specific bacteria. DynaSeed LegumeMaxx demonstrably and significantly improves nitrogen fixation, root development, and thus yield.

- ✓ With annual clovers
- ✓ Leafy growth
- ✓ Flexible in use

Components

45 %	Lolium westerwoldicum	Alberto
15 %	Italian ryegrass	Dolomit
20 %	Trifolium alexandrinum	Bluegold, Erix 
20 %	Trifolium resupinatum	Ciro, Resal 

Locations & Usage

Dry	  	Grazing	  
Normal	  	Grazing and cutting	  
Wet	  	Cutting	  
Peat Soil	  	Energy density	  
Altitude	  	Digestibility	  
Extensive usage	  	Protein	  

+++ = highly suitable| ++ = suitable | + = conditionally suitable| - = not given

Sowing rate: 35 – 40 kg/ha
Sowing time: from April to August
Usage per year: 1 – 5
