

ForageGreen Perennial

Perennial legume-rich mixture

This legume-rich mixture is suitable for multi-year use. Besides forage production, it is also ideal for soil cover. The high proportions of meadow fescue and perennial ryegrass provide the persistence needed for multi-year use. The high legume content of the mixture ensures excellent nutrient availability.

- ✓ High dry mass yields and good feed qualities through the high proportion of legumes
- ✓ Very good preceding crop effect through intensive root penetration
- ✓ Suitable for a wide range of sites, selected species and varieties

Components

40 %	Trifolium pratense
27 %	Lolium perenne
26 %	Festuca pratensis
7 %	Trifolium repens

Usage

Sowing rate	30 – 35 kg/ha
Sowing time	From Juli to September From Februar to April
