

THERESE

Lolium perenne

tetraploid
late

International listings/recommendations: DE, NL

THERESE is DSV's newest late, tetraploid perennial ryegrass suitable for peat soils. THERESE shows a balanced and persistent yield distribution with good rust resistance and sward density. This makes it ideal for grazing as well as for cultivation on peat soils.

- ✓ Suitable for peat soils and grazing
- ✓ Persisten and good sward density
- ✓ Low susceptibility to rust
