HARMONIE is a healthy variety with a solid yield performance. The Red clover reaches high dry matter yields and confirms this especially in the total dry matter yield in the second year of use as a main crop. Furthermore, HARMONIE has a good persistence and a high crude protein content. The healthiness of the variety is shown in the good resistance characteristics against anthracnose of clover and mildew.

- ✓ very healthy yielder
- ✓ high crude protein content
- ✓ a variety without weaknesses

Agronomic Characteristics

BSA-score range:	1	2	3	4	5	6	7	8	9
Beginning of flowering	-								+
