National listing / Official recommendation:
CH, CZ, DE, DK, LU

VYSOCAN scores with an extremely low hydrocyanic acid content (Best BSA-grading Score 2). The white clover shows a good yield level, this means especially the total dry matter yield and the balanced yield distribution from the first to the following cuts. VYSOCAN is a tall-growing type with a good suitability for meadow grassland and a large assertiveness in clover-grass mixtures.

- ✓ medium leaf size
- ✓ extremely low hydrocyanic acid content
- ✓ good and balanced yield capacity

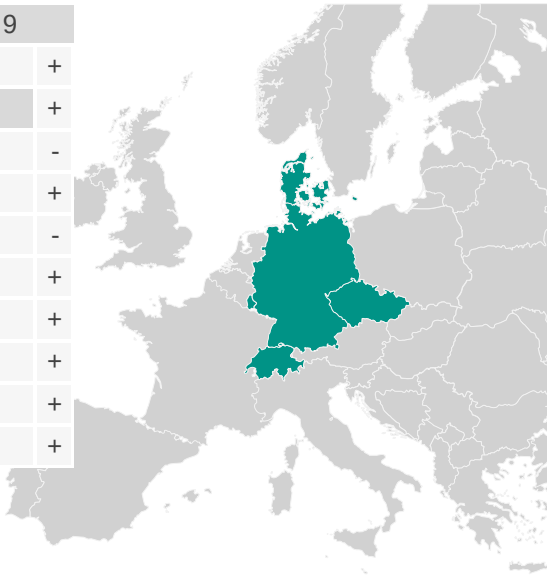

Agronomic Characteristics

BSA-score range:	1	2	3	4	5	6	7	8	9
Beginning of flowering	-								+
